

BUCCANEER PARK

RE-VISIONING

PROJECT OVERVIEW

The Buccaneer Park project will provide a framework and vision for the future improvement of Buccaneer Park with a special emphasis on the aged park restrooms and park interaction with the surrounding Coastal Rail Trail and Loma Alta Slough restoration projects. The project will begin with a thorough analysis of existing park conditions and continue to provide conceptual design for the entire park's future configuration. Full construction documents will be prepared for a new restroom to replace the old restroom facilities.

A holistic design approach that smoothly integrates the Coastal Rail Trail, Loma Alta Slough restoration, and La Salina WasteWater Treatment Plant Decommissioning with Buccaneer Park has been identified by the City as a key objective of the project. The City is committed to actively engaging the community to solicit feedback and input throughout the life of the project with a series of public workshops, surveys, online maps, and stakeholder meetings.

Attend one of the in-person workshops to give your input and feedback on the project! **If you can't make it** to one of the first two in-person workshops, visit the project website at <https://buccaneer-park-ktuagis.hub.arcgis.com/> and fill out the online text and map surveys.

Attend One Of The In-Person Workshops To Give Your Input On The Project!

Workshop #1:

Date: Saturday, July 10th

Time: 10am - 2pm

Location: Buccaneer Park -

1506 S. Pacific Street, Oceanside, CA 92054

Workshop #2:

Date: Thursday, July 22nd

Time: 9am-1pm

Location: Main Street Farmer's Market -

Corner of Coast Highway and Pier View Way
